

lev-co

The Local Exhaust and Ventilation Company

inhale...it's o.k.™

WELDING

Avoid high levels of welding fumes with a variety of "source capture" local and general ventilation solutions.

Clean air! That's the bottom line. We annihilate workplace air pollutants with cost effective clean-air solutions. **Dust, fumes** and **smoke** pollutants are no match for our:

- Weld Smoke Extraction Arms
- Dust Collection Units
- Oil Mist Collectors
- High Vacuum Units
- Garage Exhaust Systems
- Portable Fume Collectors

Call **Lev-co's** highly qualified representatives at **Equipment World** to evaluate your air quality challenges!

MACHINING

Eliminate oil mist and smoke from your machining operations with our extended filter life extraction systems that meet or exceed the latest OSHA and government standards.

PORTABLES

Toxic fumes and dust are extracted and contained in portable pre-engineered filtration systems.

VEHICLE EXHAUST

Overhead exhaust extraction reels keep areas free of obstruction and hoses while ensuring all harmful fumes are eliminated from the workplace.

DUST COLLECTION

A complete range of dust collectors from bag houses & cartridge collectors to scrubbers and specialized collectors for aluminum dust.

LABORATORY

Respond to higher standards of laboratory air quality through "extraction-at-source" and localized exhaust systems.
