

Powered Lifting Hand Trucks

PowerMate motorized hand trucks are electrically powered lifting dollies used to move loads up and down stairs and on and off trucks - safely!

Your PowerMate will do all the lifting for you - up to 1,500 lbs. PowerMates are great for moving HVAC-R supplies like boilers, furnaces, hot water tanks, large electric motors, barrels, wood stoves, safes, filing cabinets, major appliances, vending machines and many more items too heavy to move

safely with a regular hand truck. Several models to choose from with lifting capacities from 220 - 1,500 lbs. PowerMates have been proven to reduce jobsite injuries and injury claims. A PowerMate will help with product installation and save you money on labour costs.
