Forklift Tilt Level Indicator by Accu-Tilt

Incorrect tilt angle of the forks is the leading cause of both racking and product damage. Even the most experienced operator has difficulty judging the tilt of the forks when entering pallets high on the rack.

The Accu-Tilt shows the operator the level of the forks at all times, thereby reducing potential damage caused by piercing product or racking and increasing productivity by eliminating the guess work.

Additionally, the Accu-Tilt will also indicate to the operator the correct angle to travel with a load as well as parking the lift truck.

Features:

- Reduce product damage
- Reduce rack damage
- Reduce pallet damage
- Increase productivity
- Installs in less than one minute
