

FEATURING:

Lift Truck Equipment Log

Increase Safety and Reduce Operator Costs!

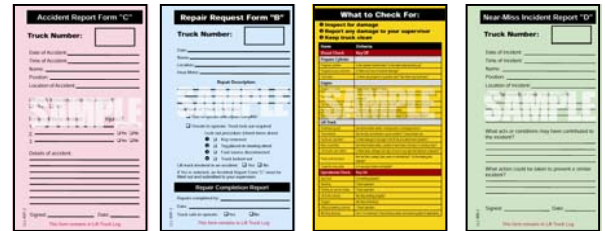

Use the best recording system to complete OSHA Required Daily Forklift Inspections.

There are 624 events that can be recorded in the Log. That provides 2-3 years of use to track your lift truck's daily inspections. It only costs approximately 4 cents per use, which is close to the cost of photocopying.

No paperwork is generated in this system until repairs are required, an accident is to be reported or a near-miss report is to be completed. This reduces paperwork and management time required.

FEATURES:

- Polyethylene caddy envelope makes it Durable and Waterproof
- Double sided tape ensures it can easily mount to any surface
- One pen with attached plastic wire to prevent loss
- 76 double sided log sheets, to perform a visual check and operational check
- Comes with lock out tag and pull strap
- Near-miss incident report (4 sheets)
- Routine maintenance Log (room for 60 entries)
- Repair request form (24 sheets)
- Accident report form (4 sheets)
