

Puzzi 100 Spray Extraction Cleaner

Feature

Benefit

Motor

Strong 1100 watt suction power

High air-flow and water-lift ratings provide an extremely high moisture recovery rate percentage

Low 68 db(A) noise level

Pleasant to use, not disruptive to others

Protection filter on motor intake

Guards against damage caused by thread or other large particle introduction into the motor fan assembly. Easily cleaned, highly visible and accessible to operators

Pump & Solution Delivery System

High quality solution pump

Maintenance-free, anti-seize pump accepts hot water up to 122° F (50° C) without difficulty

Transparent dome lid

Operator can visually confirm while working the solution is being delivered correctly, dirt is being extracted, and vacuum system is operating efficiently

Base Housing & Tools

Rugged housing

Impact and chemical resistant, shock-tested housing. Easy access to components for service

Easy to understand controls

Separate on-off switches for solution pump and vacuum motor does not confuse operator

Easy to fill and empty

Recovery tank also doubles as a refill bucket. No need to move machine when filling or emptying

Easy to maneuver

Fixed wheels at rear, swivel casters at the front allow straight tracking of machine when pulling with hose

Flexible hose, comfortable wand and tools

Metal reinforced hose is very robust and long-lasting. Balanced and easy to use tools. Handy floor tool clip on base means nothing to extra to carry when moving

Large selection of additional options

Convenient RM chemical tablets eliminates chemical wastage and cost. Wall, window, and ceiling kits add versatility, maintenance possibilities beyond the usual use of cleaning just carpets and upholstery.

Value-added Features

Buyer parts availability protection, service coast to coast

Parts availability for seven years after model discontinuation. Over 130 Kärcher service centers
