

Under Bill C-45, employers can face criminal charges for negligent actions within the workplace. PROTECT YOURSELF!

If your warehouse or storage areas contain an industrial storage system, as an employer and owner, you're obligated to comply with the equipment maintenance requirements within the Occupational Health & Safety Act (OHSA).

Equipment World's trained Rack Safety Inspectors can help safeguard you, your employees and your business!

About The Equipment World SafeRack Storage System Safety Audit:

The Rack Safety Audit is a thorough visual evaluation of the general condition of the storage system.

The audit specifically looks for:

- Visible signs of damage
- Areas of the storage system that may require replacement, repair or adjustment
- Maintenance related storage system issues

After the audit is complete, you will receive a comprehensive document including all the findings of the inspection (including site specific photos).

Don't Let THIS happen to YOU!
