

## Fall Protection Grating

### Nest & Stack Tote Boxes

#### Overview:

These versatile tote boxes stack both when full and empty, simply turn them 180° and they will easily nest. These Nest and Stack Totes are injection molded from polypropylene, so they are both durable and surprisingly lightweight!

### Efficient Storage Solutions with Nest & Stack Tote Boxes

- Our Nest & Stack Tote Boxes are the epitome of versatility and efficiency in storage management. Crafted from injection-molded polypropylene, these tote boxes are designed to offer exceptional durability paired with remarkable lightweight construction. Whether you're organizing a warehouse, streamlining a manufacturing facility, or managing inventory in retail settings, these tote boxes provide the perfect solution.

### Innovative Nesting and Stacking Design

- One of the standout features of our Nest & Stack Tote Boxes is their unique ability to both stack when full and nest when empty. Simply rotate them 180 degrees, and they seamlessly transition from stacking atop one another to nesting neatly inside each other. This dual-functionality optimizes storage space, allowing you to maximize every inch of available area efficiently.

### Durable and Lightweight Construction

- Constructed from high-quality polypropylene, our tote boxes offer durability that withstands the rigors of daily use in industrial and commercial environments. Despite their robust build, they remain surprisingly lightweight, making them easy to handle, transport, and maneuver. This blend of strength and lightness ensures longevity and ease of use, enhancing productivity across various applications.
