

## Safety Showers

We offers a range of safety equipment including drench showers, cubicle shower systems, and privacy curtains designed to ensure safety and comfort in emergency situations. These systems are ideal for environments like factories, laboratories, and schools where chemical exposure may occur. The robust construction and compliance with ANSI standards make them reliable in critical situations.

### Key Features & Benefits:

#### Floor-Mounted Drench Shower:

- Features: Stainless steel pipework, durable pull handle, compact nozzle design, and low operating torque valve.
- Benefits: Provides full-body drenching for chemical exposure, corrosion-resistant, easy activation, and reduced maintenance.

#### Cubicle Shower with Eye/Face Wash and Sump Pump:

- Features: Enclosed cubicle with GRP sheeting, stainless steel pipes, sump pump with automatic control, covered bowl, and ANSI-compliant aerated diffusers.
- Benefits: Ensures privacy, controls water overspray, and provides high-performance eye/face washing in confined spaces.

#### Wall-Mounted Modesty Curtain:

- Features: 200 denier nylon curtain, water-repellent finish, and powder-coated steel frame.
- Benefits: Offers privacy during shower use, easy to retrofit, and durable in harsh environments.
