

Fire Suppression Systems and Accessories

- Our Novec 1230 Suppression Systems provide a safe, effective waterless fire suppression solution, utilizing 3M™ Novec™ 1230 Fluid, an eco-friendly alternative to Halon. This system ensures reliable fire protection without harming the environment, making it ideal for modern applications.

Features and Benefits

- **Eco-Friendly:** Zero ozone depletion and low global warming potential.
- **Safe for Occupants:** Electrically non-conductive and safe around people.
- **High-Performance:** Outstanding extinguishing capabilities for various hazards.
- **Versatile CO2 Systems:** High and low pressure options provide reliable protection with minimal cleanup.
- **Effective Foam Solutions:** Ideal for flammable liquids, creating an expanding foam blanket to smother fires.
- **Class K Wet Chemical Extinguishers:** Specifically designed for commercial kitchens, ensuring quick and safe responses to cooking fires.
- **Small Space Suppression:** Targeted protection for confined areas, ensuring rapid fire detection and suppression.

Applications

Typical hazards protected by carbon dioxide systems are:

- Flammable Liquid Storage
- Chemical Laboratories
- Transformer Vaults
- Oil Circuit Breakers
- Engine Enclosures Pump Rooms
- Hydraulic Oil Cellars
- Gas Turbines
- Equipment Enclosures
- Storage Vaults
