

2-Post Lifts

Overview

Challenger's range of Two-Post Lifts offers unmatched versatility, efficiency, and durability for automotive service professionals. Designed to accommodate vehicles of varying sizes and weights, these lifts are ideal for servicing passenger cars, SUVs, light trucks, electric vehicles, and even heavy-duty fleet vehicles. With advanced features like adjustable height and width, durable powder-coated finishes, and multiple arm configurations, these lifts provide optimal performance while prioritizing safety and convenience.

Key Features & Benefits

- **Versatility:** Available with lifting capacities ranging from 9,000 lbs. to 20,000 lbs. to handle a wide variety of vehicles.
- **Adjustable Design:** Height and width options ensure compatibility with various shop layouts and ceiling heights.
- **Safety Features:** Integrated door guards, overhead shut-off systems, and padded base plates protect vehicles during operation.
- **Durable Construction:** Powder-coated finishes and reinforced components offer long-lasting performance.
- **Advanced Technology:** Options include Versymmetric® arms, QuickCycle™ lifting speeds, and drive-on pads for quick and accurate vehicle positioning.
- **Ease of Use:** Features like pulley-less single-point lock release systems, telescoping screw pads, and wide lifting ranges enhance operational efficiency.
