

Anti-Fatigue Matting and Flooring

Overview

Anti-fatigue matting and flooring solutions are designed to enhance worker comfort, reduce fatigue, and improve safety in demanding work environments. These ergonomic products provide durable, long-lasting support for standing and moving workers, ensuring increased productivity and reduced health risks. From industrial-grade mats to interlocking flooring systems, these solutions deliver superior traction, cushioning, and flexibility, making them ideal for a wide range of applications, including manufacturing, warehousing, and retail.

Key Features and Benefits

- **Ergonomic Comfort:** Designed to minimize fatigue and discomfort for workers standing or moving for extended periods.
- **Durability:** Industrial-strength materials withstand heavy use and harsh conditions.
- **Enhanced Safety:** Anti-slip surfaces and beveled edges reduce the risk of trips and falls.
- **Modular Design:** Interlocking systems allow for easy installation, customization, and reconfiguration.
- **Improved Productivity:** Reduces the risk of injuries and absenteeism, contributing to a healthier workplace.

Product line

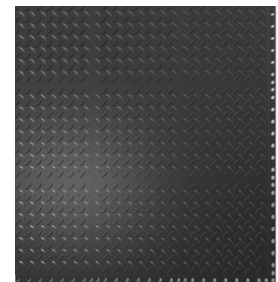

Diamond-Plate Anti-Fatigue Mats

- Durable Nitricell sponge base provides superior comfort and extended lifespan.
- Ideal for industrial applications, with enhanced traction and safety features.

Rejuvenator Interlocking Floor Matting

- Modular tiles for customizable configurations.
- High-performance urethane construction with antimicrobial properties.

24/Seven® LockSafe® Interlocking Rubber Tiles

- Positive interlocking system ensures secure, stable connections.
- Suitable for both dry and wet environments, with diamond-plate traction for added safety.
