

“Bike Stop” Two Bike Rack

SPECIFICATIONS

- Product Name: “Bike Stop” Two Bike Rack
- Single Carton Shipping Dimensions: 101.6cm L x 35.6cm W x 15.2cm H (40”L x 14”W x 6”H)
- Single Carton Shipping Weight: 5.9 kg (13 lbs)

Features

- Unique and modern architectural appearance
- Tested to survive harsh climates
- Canadian made with heavy duty steel
- Vandal-proof lock nuts included
- Square tube deters use of pipe cutters
- Designed for use with two bikes
- Can be surface mounted or imbedded in concrete

Materials

- Heavy 12 gauge hot rolled steel construction
- Frost uses Super Durable TGCI-Free Powder Coat paint on all their site furnishings products. This type of powder coating is designed for superior weatherability compared to standard TGIC polyester powder coatings. This type of paint is designed to meet the AAMA (American Architectural Manufacturers Association) standard 2603. It provides excellent exterior color and gloss retention, superior over bake resistance, and good chemical resistance. The paint is designed to withstand 1500 hours of salt spray testing and 1 year of outdoor exposure in extreme conditions.

“Surf” Six Bike Rack

Features

- Unique and modern architectural appearance
- Tested to survive harsh climates
- Canadian made with heavy duty steel
- Designed for use with up to six bikes
- Can be surface mounted or imbedded in concrete

Site Location

Frost 2090 “Surf” series steel bike racks are made of heavy duty Canadian steel with a unique and modern design. These bike racks are designed to allow for six bikes to lock to them. These are most commonly used at schools/universities, hotels, retail centers, condominiums, office buildings, city streets, and even residentially.

Materials

- All steel welded construction in heavy duty 11 & 12 gauge HRS
- Frost uses Super Durable TGCI-Free Powder Coat paint on all their site furnishings products. This type of powder coating is designed for superior weatherability compared to standard TGIC polyester powder coatings. This type of paint is designed to meet the AAMA (American Architectural Manufacturers Association) standard 2603. It provides excellent exterior color and gloss retention, superior over bake resistance, and good chemical resistance. The paint is designed to withstand 1500 hours of salt spray testing and 1 year of outdoor exposure in extreme conditions.
