

Crate Positioners

Zero-Low Crate Positioners features

- 250 to 4,000 lb. capacities
- Up to 60 degree tilt raises crate to different working positions
- Retaining plate is adjustable to different heights; when table is tilted up to 60 degrees, the load is at proper level for easy access by the user.
- Serves as economical “lift” table
- Designed to lift loads up to 36 inches high without more costly scissor lift mechanisms.
- Lowers to zero ground level for easy loading
- Units must be anchored to floor before use.

features

- 2,000 to 10,000 lb. capacities, custom units available up to 50,000 pounds!
- Various table top configurations available
- Standard table used to re-position boxes, crates, and other containers from side-to-end or side-to-side where lift conveyor is not required. Ideal for re-positioning in conveyor systems.
- V-shaped or round top available for upending coils or rolls.
- Tilts lengthwise—up to 90°
- Suitable for many useful operations
- Standard retaining plate is 24 in. high to handle most items; larger retaining plates available at extra cost. Crate Positioners must be bolted to the floor before use.
- Outriggers, wheels, and stand mounting available as options
