

## Cubicle Curtains on Tracks

Our Traditional Cubicle Curtains are available in a variety of standard and designer fabrics that can perfectly fit any hospital design aesthetic. All of our curtains are manufactured using double-needle interlock tailoring. This process ensures durability, and the curtains will have a finished look on both sides where the nylon mesh meets the curtain. Choose from our array of colors, textures, and styles that can easily be incorporated into any of our cubicle curtain system offerings, or contact us directly to get started on your custom curtains.

### Advantages

- Fabric is opaque, washable, flame retardant & closely woven
- Grommets at the top of the curtain are firmly anchored to triple thick hems
- Color-coordinated nylon mesh available
- Double-needle interlock tailoring ensures durability and a long lifecycle
- Mesh is completely bound with the same fabric as the body of the curtain, providing a more finished, aesthetically pleasing look

### Applications

- Patient rooms
- Emergency rooms
- Isolation areas
- Clinical areas
- Showers

### Building Segments

- Healthcare
- Senior Living

### Our curtain line up also includes:

- On the right track curtains
