

DEF Storage Tanks

Our DEF Storage Tanks provide a reliable solution for storing diesel exhaust fluid (DEF) on-site, designed to prevent contamination and withstand demanding job site conditions. The DEFCube range offers secure, on-demand DEF refueling for Tier 4 equipment, ensuring smooth operations with uninterrupted access to DEF.

Benefits

- **Contamination Prevention:** Designed to meet ISO 22241 standards, protecting DEF quality with double-wall containment and secure inner tank storage.
- **Operational Efficiency:** With the AutoDEF Replenish system, DEF refueling is automated, reducing manual handling and minimizing downtime.
- **Space-Saving Design:** Stackable and compact, ideal for sites with limited space, without compromising storage capacity or access.

Features

- **AutoDEF Replenish System:** Automatically refuels equipment with a built-in sensor and purge function, ensuring clean lines and easy monitoring.
- **Stackable Design:** Saves space on-site while allowing for modular storage solutions.
- **Separate Nozzles and Pumps:** Designed for easy maintenance and cleaning, ensuring DEF purity.

Types Available

- **DEFCube Standard:** Designed for rugged job sites, ensuring DEF remains uncontaminated and ready for use.
- **AutoDEF Equipped Tanks:** Featuring the AutoDEF Replenish system for autonomous refilling, ideal for larger fleets and high-demand applications.

Applications

- Ideal for use in construction, agricultural, and industrial operations, the DEFCube range keeps diesel exhaust fluid readily available on-site, reducing the need for frequent refills and ensuring equipment remains compliant and operational.
