

Evidence Lockers

- Keep your evidence safe with DASCO's Evidence Storage Lockers. This system is designed to work in many environments and suit your chain of custody model. We offer Closed-Back Evidence Lockers that keep evidence secure anywhere and Pass-Through Evidence Lockers that are installed in a wall between a secure evidence room and a long-term storage area. Both models are constructed with heavy-gauge steel bodies and quiet-close doors that are attached with full-length hidden hinges.

Features

- **Heavy-Duty Construction:** Made with heavy-gauge steel and full-length hidden hinges for maximum durability and security.
- **Electronic & Manual Lock Options:** Use RFID cards for secure access or a traditional padlock system for simplicity.
- **Quiet-Close Doors:** Reduce noise in secure areas with soft-closing doors.
- **Multiple Configurations:** Available in 1 to 6 compartment configurations for Closed-Back models and with various depth options (12", 15", 18").

Locker Types

- **Closed-Back Evidence Lockers:** Secure evidence in individual compartments with RFID or padlock access, perfect for general storage needs.
- **Pass-Through Evidence Lockers:** Installed between rooms, allowing deposit on one side and collection on the other for a seamless chain of custody.

Benefits

- **Maximized Security:** Protect sensitive evidence with advanced locking mechanisms and robust steel construction.
- **Convenient Chain of Custody:** Pass-Through models enable efficient, secure evidence transfer without compromising access control.
- **Easy Installation & Maintenance-Free:** Quick setup and zero-maintenance ensure hassle-free use in any facility.
- **Flexible Configurations:** Choose the number of compartments and depths to suit your storage requirements.
