

Fuel Trailers

Our Fuel Trailers provide a dependable, mobile fuel storage solution designed for seamless refueling on the go. Built to endure rugged conditions, these trailers ensure that your fuel is safely transported, accessible, and ready when you need it most, whether on remote sites, construction zones, or in the agricultural field.

Benefits

- **Fuel Mobility:** Transport fuel securely from site to site without delay.
- **Enhanced Efficiency:** Reduces downtime with direct refueling capabilities and extended equipment runtime.
- **Safety and Security:** Double-walled containment and lockable design prevent spills and secure fuel storage.

Features

- **Double-Walled Containment:** Ensures 110% fuel containment, eliminating environmental risks and additional containment needs.
- **Non-Hazmat Options:** Models available for easy transport without placarding, simplifying logistics.
- **Lockable Design:** Protects fuel and equipment with secure access, even during transport.

Applications

Ideal for use in fuel distribution, construction, rental services, agriculture, and any mobile refueling needs, these trailers ensure constant fuel availability wherever operations demand.

Types Available

- **TransCube Mobile Refueler:** Efficiently delivers fuel directly into equipment for longer runtimes, maximizing productivity on site.
- **MultiCube Fuel Trailer:** Non-hazmat trailer with a 630-gallon capacity, featuring six independently isolated tanks for safe diesel transport without placarding.
