

In-Plant Safety Barriers

- In-plant safety barriers are vital for safeguarding employees, equipment, and infrastructure in industrial and commercial settings. GuardRite® Safety Barriers provide robust solutions designed to absorb impacts, prevent accidents, and create safe zones within your facility.

Benefits

- **Enhanced Protection:** Safeguard against collisions from forklifts, pallet jacks, and other industrial vehicles.
- **Flexible Solutions:** Customize to fit your specific needs with GuardRite® Flex, Polymer, Steel, or Strap Systems.
- **Complies with OSHA Standards:** Meets OSHA 1910.29 Walking Working Surfaces for maximum workplace safety.
- **Durable Materials:** Built from steel, high-impact plastic, or polymer to withstand heavy force and maintain durability.

Applications

- Separate pedestrian traffic from hazardous areas
- Protect key machinery, storage areas, and pathways
- Define workspaces with visible, durable barriers
