

Material Handling Scales

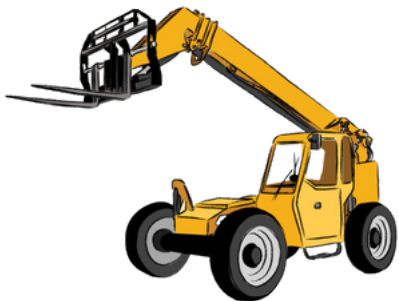

Hand Pallet Truck Scale

Efficiently weigh and move loads simultaneously with a heavy-duty hand pallet truck scale. Ideal for industrial and shipping applications, it features precise weighing, user-friendly controls, and a rechargeable battery.

Front-End Loader Scale

Lift and weigh in a single motion using a hydraulic sensing system for accurate, on-the-spot load measurements. Perfect for construction and industrial use, it ensures stability and eliminates hydraulic spiking.

Telehandler Scale

Prevent overloading with a wireless weigh system that senses load weight on telehandler forks. The durable design fits most telehandlers and includes audible and visual overload warnings, making it ideal for construction and mining.

Order Picker Scale

Easily attach weight-sensing fork covers to existing order pickers or forklifts for real-time load weighing. The rugged system requires no equipment modifications and is suitable for indoor, outdoor, and freezer applications.
