

Mezzanine & Platform Barriers

- As businesses look to expand operations by utilizing mezzanines and elevated work platforms, safety becomes a priority. Protect your employees and equipment below by installing mezzanine and platform barriers that prevent falls and secure objects.
- With systems like the GateKeeper® and RacKeeper® Safety Gates, you can ensure full-time protection in compliance with OSHA, ANSI, and IBC standards. These gates offer robust safety solutions for loading and unloading materials on elevated platforms.

Features

- **Dual Reciprocating Barrier:** Provides continuous protection at pallet drop areas, ensuring safety during loading and unloading processes.
- **Compliance:** Meets OSHA, ANSI, and IBC standards, addressing essential safety requirements for mezzanine platforms above 4 feet.
- **Versatile Applications:** Ideal for multi-level racking systems, mezzanines, elevated workspaces, and pallet drop areas.
- **Rugged Design:** Both GateKeeper® and RacKeeper® offer a durable, efficient solution to safeguard employees from fall hazards.

Features

Expand Up, Not Out:

- Increase warehouse capacity without expanding your physical footprint. Use mezzanines to build vertically while ensuring full-time protection with high-performance safety gates.

Safety First, Always:

- Don't compromise on safety while optimizing space. Our mezzanine safety solutions provide secure, easy-to-install barriers that protect your team, helping you meet industry safety standards with ease.
