

Mirrors

Mirrors are essential elements in commercial and residential spaces, combining functionality with design. From standard float glass to advanced LED-backlit models, these mirrors enhance both aesthetics and utility in washrooms and other areas.

Features

- Available with or without LED lighting for added illumination.
- Constructed from high-quality float glass with corrosion-resistant backing.
- Optional adjustable tilt or shelves for user convenience.
- Frames made from stainless steel or aluminum for durability and style.
- ADA compliant and available in various sizes to suit different needs.

Benefits

- Improves visibility and ambiance with optional LED lighting.
- Durable, corrosion-resistant materials ensure long-lasting use.
- Enhances safety with optional safety film backing and tilt functionality.

Types of Mirrors

- **LED Backlit Mirrors:** Provide soft, even lighting around the mirror for a modern look and enhanced visibility.
- **Adjustable Tilt Mirrors:** Allows users to adjust the mirror angle for accessibility and convenience.
- **Standard Float Glass Mirrors:** Durable and corrosion-resistant, ideal for general use.
- **Mirrors with Shelf:** Combines mirror functionality with additional storage for convenience.
