

Safety Eyewash Stations

We provide a wide range of emergency eye/face wash stations designed to ensure workplace safety in hazardous environments. These products are engineered to meet ANSI and EN standards, offering reliable protection from chemical spills and contaminants. Whether fixed, portable, or freeze-protected, Hughes eyewash stations are built to provide immediate relief and help minimize injury risks.

Key Features & Benefits:

Wall and Pedestal Mounted Eye/Face Wash Units:

- Features: Dual 45-degree nozzles, pop-off dust covers, stainless steel construction.
- Benefits: Durable design, easy to clean, and ANSI-compliant for reliable emergency response.

Freeze-Protected Eye/Face Wash:

- Features: Trace-tape heating, insulation, acrylic-capped ABS, adjustable flow regulator.
- Benefits: Ensures functionality in extreme cold climates, preventing freeze damage and offering protection in hazardous environments.

Portable Gravity-Fed and Pressurized Units:

- Features: Gravity-fed or pressurized systems, easy activation, and maintenance-free designs.
- Benefits: Ideal for remote locations without continuous water supply, providing ANSI-compliant relief for up to 15 minutes.

Halo™ Stainless Steel and Plastic Bowl Eye Wash Stations:

- Features: 85% facial coverage, ergonomic activation paddle, self-draining Aquaduct™ system.
- Benefits: Superior facial coverage, easy activation, and reduced bacterial growth for safer and more efficient wash-down.
