

Gas Cylinder Storage

Our heavy-duty gas cylinder storage solutions are designed for optimal safety, security, and compliance. These products, including cabinets, carts, and racks, are built with high-quality materials such as checker plate shelves, wire mesh for ventilation, and robust steel angle posts. They offer flexible features like easy assembly, adjustable doors, and vertical cylinder storage to meet CSA International B149.2-0 Propane Storage and Handling Code.

Available in different capacities, from 2 to 15 cylinders, these solutions ensure safe handling and storage of gases like propane, oxygen, and acetylene. They include safety-enhancing features like padlock hasps for security, English and French warning labels, and OSHA/NFPA compliance. Designed for both indoor and outdoor use, our products include durable finishes to prevent corrosion and injury, ensuring long-term reliability in a wide range of environments.
