

Showers and Stalls

Overview

Showers and stalls are essential components for creating functional and hygienic shower spaces in residential, commercial, and public settings. Designed for durability, ease of use, and comfort, these systems provide reliable solutions for multiple applications, from gyms to public facilities.

Key Features:

- **Complete Shower Systems:** Fully equipped with curtains, hardware, and luxury showerheads, these factory-assembled units are ready for connection to plumbing supplies.
- **Showerheads with Advanced Features:** Adjustable spray patterns, including a pulsating massage option, and heavy-duty chrome-plated construction ensure durability and comfort. Water-saving designs meet ANSI, ASME, and CSA standards.
- **High-Quality Materials:** Showers and stalls are constructed from solid HDPE plastic, which is water-resistant, mold-resistant, and easy to clean.
- **Hygienic Design:** Naturally resistant to bacteria, viruses, mold, mildew, and odors, with proven effectiveness in reducing common pathogens like MRSA and Human Coronavirus.
- **Low Maintenance:** Dent-, scratch-, and graffiti-resistant surfaces ensure longevity while minimizing upkeep costs. Power-washable and steam-cleanable for easy maintenance.
- **Sustainable and Privacy-Optimized:** Designed with an ultimate privacy option, these solutions support user comfort and environmental sustainability.

Applications:

- Gyms and fitness centers
- Public and recreational facilities
- Schools and universities
- Commercial locker rooms
- Multi-stall or private shower setups
