

## Steel Bulk Containers

### Rigid Welded Containers for Versatile Handling and Storage Solutions

Our rigid welded containers are designed to excel in a variety of shipping, processing, and storage applications. Built with heavy gauge split tube or structural steel frames, these containers offer exceptional durability and cost-effectiveness, making them a reliable choice for industrial environments.

### Features

- **Space-Saving:** Stack up to five units high, maximizing warehouse storage efficiency.
- **Durable Construction:** Heavy-gauge steel frame ensures long-lasting performance under heavy loads.
- **Versatile Options:** Available in solid sheet or expanded mesh for airflow and visibility.
- **Easy Handling:** Standard cup feet and four-way fork access make them forklift and pallet jack friendly.
- **Flexible Variants:** Collapsible and drop-bottom options for space-saving and easy loading/unloading.
- **Protective Finish:** SA medium blue powder coat offers corrosion resistance and durability.
