

Storage Lockers

- Versatile and robust, these industrial storage lockers are designed to meet the rigorous demands of daily operations across various applications. Unlike traditional personal lockers, which are typically used for individual storage in changing rooms, these lockers are tailored for securing tools, inventory, and specialized equipment within work areas.

Features

- **Construction:** Built with durability in mind, featuring side panels and doors made from framed 2" x 2" x 10GA welded wire mesh, and roof/back panels of unframed 2" x 2" x 6&8GA galvanized welded wire mesh with 1 1/4" x 1 1/4" transom angle.
- **Shelving Options:** Adjustable or fixed shelves crafted from 2" x 2" x 10Ga welded wire mesh or framed 16GA sheet metal, providing flexibility and strength to accommodate various storage needs.
- **Design for Efficiency:** Raised support legs prevent water damage with a 2" sweep, while each unit includes an adjustable anchoring bracket for secure installation on floors or walls.
- **Ventilation and Visibility:** Open wire mesh design allows for proper ventilation and full light penetration, ensuring visibility of stored items for inventory management.
- **Customization:** Available in standard sizes ranging from 3'0"H x 1'0"W x 1'0"D to 10'0"H x 4'0"W x 5'0"D, with options to mix and match panel, shelf, and door sizes to create configurations with up to 4 compartments.
- **Durability:** Sealed in grey powder-coated paint finish for maximum durability and longevity, capable of withstanding years of wear and tear in industrial environments.
