

Utility Cart Bins

Some of our Best Sellers! A seamless rotomoulded 3/16" thick body and a treated plywood base ensures these carts are built to last! With 3" threadguard casters you'll find these carts easy to maneuver. Lids are available for models 125A & 145A. TECHSTAR'S™ Regular Starcarts™ are stocked in grey with other colours available on request. Replacement casters available upon request.

Features

- **Robust Construction:** The 3/16" thick rotomoulded body and treated plywood base ensure exceptional durability, making these carts reliable for heavy-duty use.
- **Easy Maneuverability:** Equipped with 3" threadguard casters, our Regular Starcarts™ are effortless to maneuver, even when fully loaded.
- **Customization Options:** Available in stock grey with the flexibility to request other colors to suit your branding or operational needs.
- **Optional Lids:** Models 125A & 145A can be fitted with lids, providing additional security and protection for transported goods.
- **Replacement Parts Available:** Need replacement casters or other components? We've got you covered with readily available replacement parts upon request.

Next Generation Starcarts™

- The Starcart™ that has it all! TECHSTAR'S™ Next Generation Starcart™ is a force to be reckoned with! You'll find these carts more durable and impact resistant because we've combined a single wall body with a double wall box-style lip. You'll have better rollability and maneuverability because we've paired two heavy duty casters in the front with two larger poly-core wheels in the rear. Add the strength of the steel undercarriage and the ergonomic moulded in handles and you have what we believe to be the best poly-cart on the market!
