

Warehouse Fence Systems

Safety You Can Trust:

- Cogan wire mesh rack guards provide a solid wall of protection between your employees and your inventory. By bolting directly to pallet uprights, these resilient guards form a barrier against falling debris, protecting workers from accidents caused by forklift bumps or pallet breaks.

Durable Construction:

- Engineered tough with an all-welded angle frame, Cogan rack guards feature rugged 2" x 2" x 10GA welded wire mesh panels that stand up to the rigorous demands of industrial use. Designed for long-lasting durability, they ensure reliable protection day in and day out.

Increased Visibility & Ventilation:

- The wire mesh design allows for clear visibility of your inventory, ensuring fast visual checks and proper ventilation, helping maintain an efficient and safe workspace

Benefits

- Enhanced Safety: Protect employees from falling materials in warehouse aisles.
- Durability: Sturdy, all-welded construction designed to last.
- Easy Installation: Simple nut-and-bolt assembly keeps costs low.
- Versatile Fit: Options for flush or offset mounting, including support for extending above racks.

Maximize Protection, Minimize Risk

- Whether safeguarding workers or reducing costly damage, Cogan's wire mesh rack guards are a smart, cost-effective solution for any warehouse.
