

Entrance Grilles

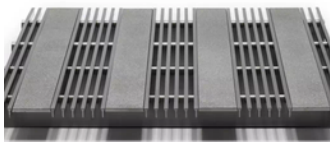

Permanent Grills

High-end and heavy-duty grid systems that effectively remove debris, providing a permanent and integrated solution to capturing tracked-in dirt and water.

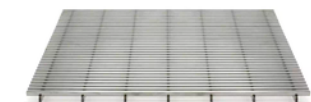

GridLine® G6

GridLine® (G6) is a high-end, heavy-duty stainless steel grid system effective at removing debris. It provides a permanent, integrated solution to battling tracked-in dirt and water. GridLine is available in Type 304 or 316 stainless steel and has a 1000 lb-per-wheel rolling load capacity. It also comes standard with our factory-installed lockdown tabs for faster and easier installation.

GridLine® 2 G6PR

GridLine® 2 Radius (G6PR) is a customizable, radiused architectural entrance grid that offers a wider profile bar, U-clip support structure, satin-finished Type 304 or 316 stainless steel, and a 500 lb-per-wheel rolling load capacity. GridLine 2 Radius is ideal for inside or around revolving doors. It also comes standard with our factory-installed lockdown tabs for faster and easier installation.

GridLine® 2 G62

GridLine® 2 (G62) is a high-end, heavy-duty stainless steel grid system effective at removing debris and providing a permanent, integrated solution to battling tracked-in dirt and water. This twist on classic GridLine features wider rails and is available in Type 304 or 316 stainless steel.

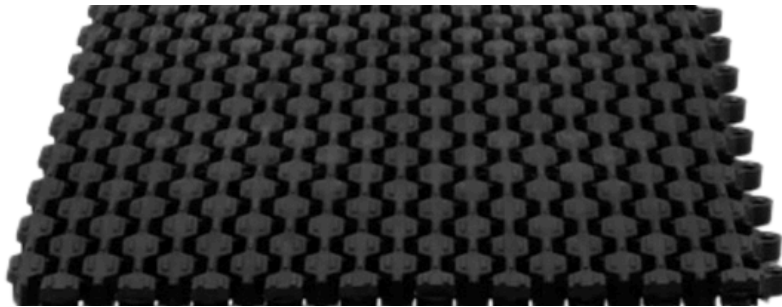

Entrance Mats

Entrance matting is the first line of defense in keeping dirt and debris from entering the building and can remove up to 80% of dirt.

Key Features:

- **Durability:** Constructed to withstand heavy foot traffic.
- **Slip Resistance:** Provides enhanced traction to reduce the risk of slipping.
- **Easy Maintenance:** Many entrance mats can be rolled up or removed for convenient cleaning.
- **Modular Systems:** Some mats are designed with tiles or interlocking pieces, allowing for flexible configurations.
- **Surface and Recess Mounting:** Options available to suit different installation needs.
- **Customizable Designs:** Available in a variety of textures, colors, and finishes to match any décor.

Benefits:

- **Cleaner Floors:** Effectively traps dirt and moisture, keeping entryways and interior floors clean.
- **Safety:** Helps prevent accidents by reducing slippery conditions.
- **Enhanced Appearance:** Improves the overall look of entranceways, making a positive first impression.
- **Long-lasting Performance:** Built for long-term use in high-traffic areas.

Applications:

- Offices & Mixed-Use Buildings
- Retail & Hospitality Spaces
- Healthcare Facilities
- Educational Institutions
- Aviation & Transportation Hubs
- Senior Living & Residential Buildings
