

Mobile Column Lifts

Mobile column lifts are versatile, portable, and efficient solutions for lifting various vehicles in automotive workshops or on-site locations. Designed for flexibility and safety, they can lift vehicles of different sizes and weights, making them ideal for a range of maintenance tasks, including electric vehicle servicing.

Key Features

- **Capacity Options:** Lift capacities range from 12,500 lbs. to 19,000 lbs. per column, with sets supporting up to 152,000 lbs.
- **Wireless Operation:** Eliminates cables for a clutter-free workspace and enhanced safety.
- **Adjustable Design:** Fits a wide range of wheel sizes and accommodates dual-tire vehicles.
- **Portability:** Equipped with tow handles and spring-loaded wheels for easy movement.
- **Battery Powered:** Rechargeable systems with no air requirements for convenience.
- **Scalability:** Connect multiple columns for heavy-duty needs, supporting larger vehicles or fleets.

Benefits

- Maximizes workspace flexibility, turning any flat surface into a productive area.
- Provides full under-vehicle access for tasks like battery replacements or heavy-duty repairs.
- Ideal for workshops, mobile repair services, and low-ceiling spaces.
